

# Architecture Style Assignment

Name: Nurhayati Aiman Binti Shaiful Akmam

Matric number:207545

Identify any three software framework from the web and identify the architecture style on it.

1- Framework 1:

- Name:Flutter
- Style: Layered
- Justification: In Flutter, each layers has privileged access to the layer below, and every
- part of the framework level is designed to be optional and replaceable.

2- - Framework 1:

- Name: Spring boot
- Style: Layered style
- Justification: Spring boot follows a layered architecture in which each layer
- communicates to other layers. Spring contains 4 layers including presentation layer,
- Business layer, persistence layer and database layer

3- Framework 2:

- Name: PushPin
- Realtime
- Style: Publish subscriber style
- Justification: PushPin is an open-source, real-time messaging framework that is suitable
- for sending real-time push notifications. It is implemented with WebSocket, HTTP
- streaming, and HTTP long-polling services to push messages.
